GitHub: www.phoenixpan.com
Location: Sydney, Australia

Skills

Languages: TypeScript, JavaScript (*prior experience with Java, Python, C#*)
Frontend: React, React Native, Redux, Storybook, Jest, Cypress
Backend: Node.js, GraphQL, REST APIs, .NET
Cloud & Infrastructure: AWS, Kubernetes, Helm, Docker, HashiCorp Vault
Data: SQL Server, MySQL, ClickHouse
Tools: Git, GitHub Actions, Jira, Bitbucket

Professional Experiences

Senior Full-Stack Engineer, Darwinium, Sydney

Nov 2023 – present

Darwinium is a fraud prevention and security platform processing over 250 million events per month for enterprise customers worldwide

- **Edge Deployment Platform** - Led development of a multi-CDN edge deployment platform used by enterprise customers, enabling deployment and management across Akamai, CloudFront and Cloudflare environments. Designed deployment orchestration, Kubernetes cluster lifecycle management, certificate automation, secret management and deployment workflows across React, Node.js and cloud infrastructure
- **Rules Editor V2** - Architected and delivered a modern, extensible rule-authoring platform. Designed state management, migration strategy, language-server integration and reusable architecture for future migrations. The platform powers fraud-detection workflows that help protect millions of end users.
- **Incident Management Platform** - Built the platform from scratch, delivering configurable queues, workflow management, administration tooling and role-based access controls for enterprise incident-response operations
- **Audit & Compliance** - Implemented audit and change-tracking capabilities across deployment and configuration workflows, providing traceability, operational governance and compliance support for enterprise customers
- **Large-Scale Data Processing** - Redesigned client-side processing pipelines for large-scale datasets, eliminating request failures and reducing export times by 30%+ through streaming, batching and service worker concurrency optimizations while ensuring sensitive customer data never left the client environment

Technologies: TypeScript, React, Node.js, Kubernetes, AWS, ClickHouse, HashiCorp Vault, Akamai, CloudFront, Cloudflare

Frontend Engineer, PlayUp, Sydney

Sep 2021– Sep 2023

Delivered major frontend initiatives for a betting platform generating more than \$30m in annual revenue

- Developed and maintained web and mobile applications using React, React Native and TypeScript across multiple international markets
- Led frontend **expansion** into the US market, implementing localization, compliance, and market-specific UX

- Rebuilt critical customer acquisition and payment workflows, improving onboarding experience and **conversion rates** and ensuring reliable transaction processing for a critical revenue path
- Created an internal **component library** and adopted it across multiple products, reducing duplication and accelerating feature delivery
- Modernized frontend infrastructure with Webpack upgrades (from 3 to 5), dependency refreshes, CI/CD improvements and engineering standards adoption
- Established testing and quality practices using Jest, Cypress, ESLint and automated development workflows to improve release confidence and developer productivity

Technologies: React, React Native, TypeScript, Storybook, Jest, Cypress, Webpack, GitHub Actions, i18next

Full-stack Engineer, Plenti Pty Ltd, Sydney

Dec 2017 – Aug 2021

ASX-listed fintech platform facilitating more than \$50m in monthly loan originations, where I owned the lender-facing product experience

- Rebuilt legacy Angular projects using **React** and Redux, improving maintainability and enabling continued product evolution
- Led development and maintenance of lender-facing financial products serving more than **25,000 users**
- Implemented UI/UX designs and **A/B tests** with designers and product managers to collect **user feedback**
- **Automated** laborious financial reconciliation process, reducing manual effort and improving operational efficiency across multiple business functions
- Integrated observability and analytics platforms including Datadog, HEAP and FullStory to improve product insights and platform reliability

Technologies: React, Redux, TypeScript, Node.js, .NET, SQL Server, Datadog, FullStory

Cloud Engineer Intern, Southern Cross Care, Adelaide

Feb 2017 – May 2017

Reduced the overall AWS costs by 30% and automated the database backup process

Full-stack Engineer Intern, Government of South Australia, Adelaide

Jan 2017 – May 2017

Built mobile voting application and AWS-hosted backend services.

Researcher Intern, Mitsubishi Electric, Tokyo

Jun 2016 – Aug 2016

Developed Android healthcare prototype used for executive product evaluation.

Assistant Product Manager, Menusifu Inc., New York

Oct 2014 – Jun 2015

Improved product quality and customer satisfaction through user feedback analysis and prioritisation.

Education

Carnegie Mellon University, Pittsburgh & Adelaide

2015 - 2017

Master of Science in Information Technology GPA: 3.8/4.3

Honors: *Dean's List (2015-2017); Graduated with Distinction*

University of Indianapolis, Indianapolis

2012 - 2014

Bachelor of Arts in International Business GPA: 3.9/4.0

Honors: *Dean's List (2012-2014); Graduated Summa Cum Laude (High Distinction)*
